

Ambulatory Surgery needs further improvements – again. Therefore the IAAS will try to make it even more like other web published journals and in accordance with the demands from PUB med and other indexes.

From 2010 the changes can be seen. However, the scientific level will still be the same high level as you may see in this edition. Improvements for both Journals and Association related work is an ongoing process. Therefore we are also working hard to make the next

international congress in Copenhagen 2011 even more interesting than the former very well managed congresses. Please refer to the website www.iaascongress2011.org to keep you updated and go to the contact formula in order to get the most recent information.

Claus Toftgaard
President for the 9th International congress 2011
Associate editor
